Funding Agency: The Bill & Melinda Gates Foundation - Grand Challenges in Global Health

Grand Challenges in Global Health is a family of grant programs focused on one unifying purpose: To overcome persistent bottlenecks in creating new tools that can radically improve health in the developing world.

Grand Challenges in Global Health was launched in 2003, and several years later - 45 grants totaling $458 million were awarded for research projects involving scientists in 33 countries. These projects were managed by teams working in partnership across disciplines, sectors, and countries, and many featured work from leaders in fields such as chemistry, engineering, statistics, and business, who had never before focused on global health. New Grand Challenges in Global Health projects are currently under way.

Call type and title: Grand Challenges Explorations Round 15

Grand Challenges Explorations(GCE)supports hundreds of early-stage research projects –including many ideas that have never before been tested–and scientists from a wide range of disciplines and regions. The Explorations initiative funds innovative ideas that could lead to new vaccines, diagnostics, drugs, and other technologies targeting diseases that claim millions of lives every year.

Grand Challenges Explorations Round 15 Topics

- Addressing Newborn and Infant Gut Health Through Bacteriophage-Mediated Microbiome Engineering
- Explore New Ways to Measure Delivery and Use of Digital Financial Services Data
- Surveillance Tools, Diagnostics and an Artificial Diet to Support New Approaches to Vector Control
- New Approaches for Addressing Outdoor/Residual Malaria Transmission
- New Ways to Reduce Childhood Pneumonia Deaths Through Delivery of Timely Effective Treatment
- Enable Merchant Acceptance of Mobile Money Payments

Budget: Phase I grants of $100,000 USD are awarded initially; projects have one opportunity to apply for a follow-on Phase II grant of up to $1,000,000 USD.

Submit to the Research Authority till 24/4/15
