

# MM-WAVE IMAGING FOR DETECTION OF HIDDEN OBJECTS

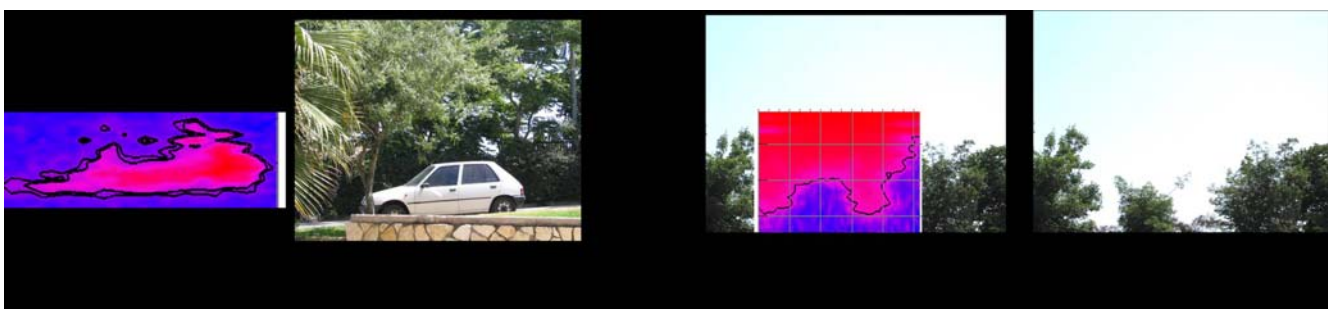

Passive and active Millimeter Wave Imaging is a new technology that enables remote detection of metallic and nonmetallic concealed weapons, plastic explosives, drugs, and other hidden objects. The technology is crucial for Homeland Security needs

Experimental setup: in-door

## Function of optic & mm-wave passive images

Indoor Scan

Outdoor Scan

### The development is supported by:

The Israeli FEL National Knowledge Center for Radiation Sources and Applications, Under the auspices of The Israel Ministry of Science.

and by MAGNET AVNET 37 Consortium (Hidden Objects Detection).
