**Funding Agency:** Fanconi Anemia Research Fund

Lynn and Dave Frohnmayer started the Fanconi Anemia Research Fund, Inc. in 1989 to find effective treatments and a cure for Fanconi anemia and to provide education and support services to affected families worldwide. The mission of the fund is to find effective treatments and a cure for Fanconi anemia and to provide education and support services to affected families worldwide.

**Call type and title:** Grant Applications

**Pilot Study and Supplementary Awards**

The Fanconi Anemia Research Fund, Inc. is seeking applications for basic or applied research into the mechanisms, pathogenesis and/ or treatment of Fanconi anemia. These awards are usually for one or two years of support and are intended to fund pilot studies designed to test new ideas and to provide initial data to support applications for further funding by other (and larger) agencies supporting biomedical research.

Better understanding of Fanconi anemia that can lead to effective treatment of the various phases of the disease is urgently needed. In addition, studies of Fanconi anemia may also have important implications for solid tumor malignancies such as head and neck, gastrointestinal and gynecological cancers.

* The pre-proposal shall be no longer than one page and must include specific aims, a lay abstract, and translatable applicability. Pre-proposals longer than one page will be returned. The submitting investigator will then be informed in a timely manner whether he or she has been invited to submit a full proposal.

**RFAs**

In addition to accepting applications for research on all aspects of Fanconi anemia, the Fund has issued the following RFA's:

- RFA for Head and Neck Carcinogenesis
- RFA for Endocrine Organ Dysfunction

Proposals Submitted under the above RFAs, will have the same due dates as below.

* The priority score will not be affected by the budget.
